AEROFLEX
A passion for performance.

The RCTS-002HQ provides capabilities for semi-automated testing of UHF and VHF HAVEQUICK II and tactical communications.

The RCTS-002HQ Radio Test System is made up of the general purpose TS-4532* Communication Test Set in association with the J-4843A Generic Appliance Housing with RPM-002HQ (PL-1538A) and PS-001 (PP-8468) Generic LRU Power Supply. The RCTS-002HQ Radio Test System is a self-contained, transportable, semi-automated Test System that may be used for a "go/no-go" evaluation, full functional testing and troubleshooting. The basic Test System provides the capability to test in the VHF, UHF frequency bands; AM and FM modulation waveforms; and MIL-STD-1553 interfaces. All LRUs listed can be verified, tested and repaired when used in conjunction with the Maintenance Group (Cables, Repair Manuals, Special Tools, etc.)

Note: RCTS-002HQ requires an export license outside of the US.

RPM-002HQ (PL-1538A) RSC/AIRFORCE RPM Accessories

Accessory Number	Corresponding Military No	Description
TF-204A	(TF-204A)	BIT Test Adapter for RPM-002HQ
LK-204		Lockout Key for RPM-002HQ
ON-RSC		Maintenance Group for RPM-002HQ (Custom Command)

PS-001 (PP-8468) Generic LRU Power Supply

The PS-001 (PP-8468) connects to the bottom of the RCTS configuration to supply primary power for Units Under Test (UUT) and, in some cases, to the J-4843A and RPM-002HQ (PL-1538A). The PS-001 (PP-8468) is capable of supplying programmable voltage levels from 3 to 30 V at up to 20 A. Additional voltages are provided for secondary needs.
