
Agilent N2757A GPIB Interface Module

The Agilent N2757A GPIB Interface Module provides remote communication with fast data transfers and full programmability for the following Agilent 54620/40-series Oscilloscopes:

54621A, 54622A, and 54624A Oscilloscopes
54621D and 54622D Mixed-Signal Oscilloscopes
54641A and 54642A Oscilloscopes
54641D and 54642D Mixed-Signal Oscilloscopes

The GPIB port can be used for remote programming and to link your pc to the oscilloscope when using the IntuiLink for 54600-series Oscilloscopes connectivity software. For programming specifics, refer to the 54620/40-series Oscilloscope Programmer's Guide shipped with your oscilloscope. For connectivity, refer to the IntuiLink for 54600-series oscilloscopes software for complete instructions.
