

## LXI lass C certified

## Available frequncy ranges

N9030A-503 3 Hz to 3.6 GHz
N9030A-508 3 Hz to 8.4 GHz
N9030A-513 3 Hz to 13.6 GHz
N9030A-526 3 Hz to 26.5 GHz
N9030A-543* 3 Hz to 43 GHz
N9030A-544* 3 Hz to 44 GHz
N9030A-550* 3 Hz to 50 GHz
*Specifications associated with mmW Options 543, 544, or 550,
are either preliminary or not yet available.

Agilent's future-ready PXA signal analyzer is the evolutionary replacement for your current highperformance analyzer. It helps you sustain past achievements, enhance current designs and accelerate future innovations.

Its performance, flexibility, capability and compatibility enable you to address demanding applications in aerospace, defense, commercial communications and more.

- Reveal new levels of signal detail with outstanding RF performance
- Increase test throughput and protect your system investments
- Refresh legacy systems with a highly compatible replacement

## Definitions and Conditions

Specifications describe the performance of parameters covered by the product warranty and apply to temperature ranges 0 to $55^{\circ} \mathrm{C}$, unless otherwise noted.

95th percentile values indicate the breadth of the population (approx. 2б) of performance tolerances expected to be met in 95 percent of the cases with a 95 percent confidence, for any ambient temperature in the range of 20 to $30^{\circ} \mathrm{C}$. In addition to the statistical observations of a sample of instruments, these values include the effects of the uncertainties of external calibration references. These values are not warranted. These values are updated occasionally if a significant change in the statistically observed behavior of production instruments is observed.

Typical describes additional product performance information that is not covered by the product warranty. It is performance beyond specifications that 80 percent of the units exhibit with a 95 percent confidence level over the temperature range 20 to $30^{\circ} \mathrm{C}$. Typical performance does not include measurement uncertainty.

Nominal values indicate expected performance, or describe product performance that is useful in the application of the product, but is not covered by the product warranty.

The analyzer will meet its specifications when:

- The analyzer is within its calibration cycle.
- Under auto couple control, except that Auto Sweep Time Rules = Accy.
- For signal frequencies $<10 \mathrm{MHz}$, DC coupling applied.
- The analyzer has been stored at an ambient temperature within the allowed operating range for at least two hours before being turned on, if it had previously been stored at a temperature range inside the allowed storage range but outside the allowed operating range.
- The analyzer has been turned on at least 30 minutes with Auto Align set to normal, or if Auto Align is set to off or partial, alignments must have been run recently enough to prevent an Alert message. If the Alert condition is changed from Time and Temperature to one of the disabled duration choices, the analyzer may fail to meet specifications without informing the user.

This PXA signal analyzer data sheet is a summary of the complete specifications and conditions. The complete PXA Signal Analyzer Specification Guide can be obtained from the web at:
www.agilent.com/find/pxa_specifications
Specifications associated with Option 543, 544, or 550 are either preliminary or not yet available.

## Frequency and Time Specifications

| Frequency range | DC coupled | AC coupled |
| :---: | :---: | :---: |
| Option 503 | 3 Hz to 3.6 GHz | 10 MHz to 3.6 GHz |
| Option 508 | 3 Hz to 8.4 GHz | 10 MHz to 8.4 GHz |
| Option 513 | 3 Hz to 13.6 GHz | 10 MHz to 13.6 GHz |
| Option 526 | 3 Hz to 26.5 GHz | 10 MHz to 26.5 GHz |
| Option 543 | 3 Hz to 43 GHz |  |
| Option 544 | 3 Hz to 44 GHz |  |
| Option 550 | 3 Hz to 50 GHz |  |
| Band LO multiple (N) |  |  |
| $0 \quad 1$ | 3 Hz to 3.6 GHz |  |
| 1 1 | 3.5 to 8.4 GHz |  |
| 2 | 8.3 to 13.6 GHz |  |
| $3 \quad 2$ | 13.5 to 17.1 GHz |  |
| 4 | 17 to 26.5 GHz |  |
| $5 \quad 4$ | 26.4 to 31.15 GHz |  |
| 6 8 | 31 to 50 GHz |  |
| Precision frequency reference |  |  |
| Accuracy | $\pm$ [(time since last adjustment x aging rate) + temperature stability + calibration accuracy] |  |
| Aging rate | $\begin{aligned} & \pm 1 \times 10^{-7} / \text { year } \\ & \pm 1.5 \times 10^{-7} / 2 \text { years } \end{aligned}$ |  |
| Temperature stability $20 \text { to } 30^{\circ} \mathrm{C}$ <br> Full temperature range | $\begin{aligned} & \pm 1.5 \times 10^{-8} \\ & \pm 5 \times 10^{-8} \end{aligned}$ |  |
| Achievable initial calibration accuracy | $\pm 4 \times 10^{-8}$ |  |
| Example frequency reference accuracy 1 year after last adjustment 20 to $30^{\circ} \mathrm{C}$ | $\begin{aligned} & = \pm\left(1 \times 1 \times 10^{-7}+1.5 \times 10^{-8}+4 \times 10^{-8}\right) \\ & = \pm 1.55 \times 10^{-7} \end{aligned}$ |  |
| Residual FM <br> Center frequency $=1 \mathrm{GHz}$ <br> 10 Hz RBW, 10 Hz VBW | $\leq(0.25 \mathrm{~Hz} \times \mathrm{N}) \mathrm{p}-\mathrm{p}$ in 20 ms nominal See band table above for N (LO multiple) |  |
| Frequency readout accuracy (start, stop, center, marker) |  |  |
| $\pm$ (marker frequency x frequency reference accuracy $+0.10 \% \mathrm{x}$ span $+5 \% \times \mathrm{RBW}+2 \mathrm{~Hz}+0.5 \times$ horizontal resolution ${ }^{1}$ ) |  |  |
| Marker frequency counter |  |  |
| Accuracy | $\pm$ (marker frequency x frequency reference accuracy +0.100 Hz ) |  |
| Delta counter accuracy | $\pm$ (delta frequency x frequency reference accuracy +0.141 Hz ) |  |
| Counter resolution | 0.001 Hz |  |
| Frequency span (FFT and swept mode) |  |  |
| Range | 0 Hz (zero span), 10 Hz to maximum frequency of instrument |  |
| Resolution | 2 Hz |  |
| Accuracy Swept FFT | $\begin{aligned} & \pm(0.1 \% \text { x span }+ \text { horizontal resolution }) \\ & \pm(0.1 \% \text { x span }+ \text { horizontal resolution }) \end{aligned}$ |  |

## General Specifications

## Temperature range

| Operating <br> Storage | 0 to $55^{\circ} \mathrm{C}$ <br> -40 to $+65{ }^{\circ} \mathrm{C}$ |
| :--- | :--- |
| Altitude |  |
|  | 4,500 meters (approx 14,760 feet) |
| EMC |  |

Complies with European EMC Directive 2004/108/EC

- IEC/EN 61326-1 or IEC/EN 61326-2-1
- CISPR Pub 11 Group 1, class A ${ }^{1}$
- AS/NZS CISPR 11:2002
- ICES/NMB-001

This ISM device complies with Canadian ICES-001
Cet appareil ISM est conforme à la norme NMB-001 du Canada

## Safety

Complies with European Low Voltage Directive 73/23/EEC, amended by 93/68/EEC

- IEC/EN 61010-1 2nd Edition
- Canada: CSA C22.2 No. 61010-1
- USA: UL 61010-1 2nd Edition

| Acoustic noise |  |
| :--- | :--- |
| Acoustic noise emission | Geraeuschemission |
| LpA $<70 \mathrm{~dB}$ | Am Arbeitsplatz |
| Operator position | Normaler Betrieb |
| Normal position | Nach DIN 45635 t. 19 |
| Per ISO 7779 | Nominally under 55 dBA Sound Pressure. 55 dBA is generally considered suitable for <br> use in quiet office environment |
| Acoustic noise - more information | Nominally under 65 dBA Sound Pressure. 65 dBA is generally considered suitable for <br> use in noisy office environment |
| Ambient temperature <br> $<40^{\circ} \mathrm{C}$ |  |
| $\geq 40^{\circ} \mathrm{C}$ |  |

## Environmental stress

Samples of this product have been type tested in accordance with the Agilent Environmental Test Manual and verified to be robust against the environmental stresses of storage, transportation, and end-use; those stresses include, but are not limited to, temperature, humidity, shock, vibration, altitude, and power line conditions; test methods are aligned with IEC 60068-2 and levels are similar to MILPRF-28800F Class 3.

| Power requirements |  |
| :--- | :--- |
| Voltage and frequency (nominal) | 100 to $120 \mathrm{~V}, 50 / 60 / 400 \mathrm{~Hz}$ |
|  | 220 to $240 \mathrm{~V}, 50 / 60 \mathrm{~Hz}$ |
| Power consumption |  |
| On | 450 W (fully loaded with options) |
| Stanby | 40 W |

1. The N9030A is in full compliance with CISPR 11, Class A emissions and is declared as such. In addition, the N9030A has been type tested and shown to meet CISPR 11, Class B emissions limits. Information regarding the Class B emission performance of the N9030A is provided as a convenience to the user and is not intended to be a regulatory declaration.

## Inputs and Outputs
