

TCM201 Series Digital Force Tester (225 lbf, 1000 N)

Specification Sheet
SS-FM-3117-0904
September 2004

The TCM201 Series of motorized test stands offer customers an easy-to-operate motorized testing system that is precise enough for the laboratory and rugged enough for the production floor. Stands feature an all-metal construction with ball screw and dual support columns for positive motor control and minimal deflection. Manually adjustable limits stop crosshead travel at precise user specified locations. Rotary dials are easy to operate and allow the user to specify speed requirements and test mode. Dedicated function keys provide fast motion control adjustment (up, down, stop). Units operate in four modes: single cycle at upper limit, single cycle at lower limit, continuous cycling between limits, and manual. A selector switch is provided for specifying return speed after testing.
