

## Features

Frequency range of 10 kHz to 400 MHz Fully compliant with DO-160/ MIL-STD 461 "Air-core" inductors to prevent saturation Individual Calibration Included Three-Year Warranty

## Description

The LI-325C Line Impedance Stabilization Network (LISN) provides the necessary measurement platform for performing power line conducted emissions compliance testing as required by most worldwide standards for commercial products. The LI-325C is compliant with both RTCA DO-160 and MIL-STD 461.

The LISN provides defined stable impedance and isolates the EUT from power source influences, thereby providing accurate and repeatable results.

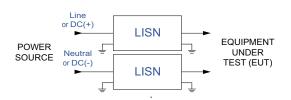

The LI-325C includes one pair of, separately housed, single-conductor networks, to be installed in series with each current-carrying conductor in a single-phase, dual-phase or DC power system. A second LI-325C pair can be used to accommodate 3-phase power systems (Wye or Delta configurations).

The LI-325C is equipped with Superior Electric SUPERCON<sup>®</sup> shrouded sockets at the mains (power input) and EUT (power output) ports. The matching color-coded plugs for connection to the mains and EUT wiring are included.

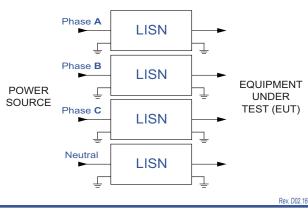

This LISN uses air-core inductors to prevent saturation and permeability variation. The mounting plate of the LI-325C is left unpainted in order to facilitate connection to earth ground in its installation, which is essential due to high leakage current. All LI-325C LISNs are individually calibrated in compliance with the relevant requirements of RTCA DO-160 and MIL-STD 461. Impedance and Insertion Loss data is supplied with each unit, along with the calibration certificate.

## **Typical Connection Diagrams**

Single Phase connection with one set of LISN

## Application

Product Name	Line Impedance Stabilization Network (LISN)
Specification	RTCA DO-160 / MIL-STD 461D
Application	Power line conducted emissions tests
Frequency Range	10 kHz to 400 MHz
RF Connector	50Ω N-type (female)
Current Rating	25 Amperes <sub>(AC)</sub> , 17 Amperes <sub>(DC)</sub>
Voltage Rating	270 VAC (Line to Ground), 380 VDC
Inductors	5 µH (air-core)
Mains & EUT Connections	Superior Electric SUPERCON® shrouded sockets
Dimensions (each network)	11.8 x 5.7 x 5.3 inches / 30 x 14.5 x 13.5 cm
Weight (each network)	5 lbs. / 2.2 kg
Insertion Loss	< 0.3 dB (150 kHz to 30 MHz)

All specifications are subject to change without notice. All values are typical, unless specified.
