

Fluke 789 <u>ProcessMete</u>r™

Technical Data

Double your power.

The Fluke 787 ProcessMeter was the first tool to combine a loop calibrator with a DMM to give process technicians double the power in one tool. Now it's even better – the ultimate loop calibration multimeter – the Fluke 789 ProcessMeter.

The 789 has a display that's not only twice as large, but also twice as bright with two levels of backlighting. And with its built-in, selectable 250 ohm HART® resistor, it eliminates the need to carry a separate resistor with you.

Now process technicians can do a lot more while carrying a lot less.

Key new features of the Fluke 789

- 24 V Loop power supply
- HART mode setting with loop power (adds 250 ohm resistor)
- 100 % larger dual display
