

QUICK REFERENCE SALES GUIDE

Datacom Contractors

Datacenter / Network Managers

Communications Service Technicians

Fluke Networks is the worldwide leader in certification, troubleshooting, and installation tools for professionals who install and maintain critical network cabling infrastructure. From installing the most advanced data centers to restoring service in the worst weather, our combination of legendary reliability and unmatched performance ensure jobs are done efficiently.

Why trust Fluke Networks?

- Endorsed by 28 Cabling Manufacturers Worldwide
- Member or Participant in Ten Industry Standards Organizations
- Part of the Fluke Corporation, a leader in testing since 1948

Who relies on Fluke Networks?

- The world's ten largest companies (based on Fortune® magazine)
- Major data center operators: Amazon, Apple, Equinix, Facebook, Google, and Rackspace
- Leading communications providers: AT&T, China Mobile, Deutsche Telekom, NTT, Orange, Verizon
- Financial Leaders: Allianz, Bank of America, Barclays, Industrial and Commercial Bank of China, Morgan Stanley
- Research and Education: CERN, Harvard, Max Planck Institute, Oxford, Stanford

Be sure to mention Gold...

When selling our products, be sure to offer Gold Support to your customers. Gold Support is much more than just a repair warranty. It is a comprehensive maintenance and support program that offers expanded coverage for Fluke Networks' products and accessories. It provides a premium level of support to minimize business downtime and ensure a high return on your investment.

Gold keeps your customers' unit maintained

Benefits	Gold Member	Non-gold Member
Live Technical Support with exclusive phone numbers	✓	
FREE Repair with "first on bench" turnaround service	✓	
Loaner Equipment Service*	✓	
FREE Accessory Replacements**	✓	
FREE Annual Calibration	✓	
Member Only Promotions	✓	
Access to Technical Support	Web, Email and Phone	Web and Email
Response time from Technical Support	<2 Hours	<24 Hours
Customer Support - Phone and Email	24x7x365	7am-5pm (Pacific Time)
Primary Case Handling	Technical Support Engineer	Customer Service Agent

* Available in certain geographies

** Applies to accessories included in the original product bundle

The economic case for Gold is clear when comparing the cost of Gold to the cost of the individual services it replaces.

Product	Repair Cost	Loaner Unit (1 week)	Accessory Replacement	Calibration	24/7 Technical Support	Average Annual Value
DSX	\$1598	\$800	\$583	\$500	\$500	\$4546
OptiFiber Pro	\$2043	\$1110	\$500	\$580	\$500	\$4733
CertiFiber Pro	\$600	\$400	\$227	\$500	\$500	\$2227

For more information on our Gold Support programs, visit www.flukenetworks.com/gold

Gold Support

- Free calibration/factory refresh
- Firmware/software upgrades
- Priority factory repair
- Loaner units during repair
- Unlimited 24/7 Technical Support
- Accessory replacement

VERSIV™

Cabling Certification System

Certifying a cable is one part of a process that starts with systems design and ends with systems acceptance. The faster that process goes, the more profitable you'll be. Unfortunately, there are a lot of things that slow the process down - testing to the wrong limits, waiting for lead technicians to set up or troubleshoot, and incomplete results.

Research from Fluke Networks shows that over 90% of contractors report dealing with issues related to set-up, testing, and reporting every month. ***It adds up to a week of wasted labor on a typical 1,000 drop job.***

Versiv is designed to eradicate these problems. Its ProjX™ System manages job requirements and progress from setup to systems acceptance, making sure all tests are completed correctly. The Taptive™ User Interface simplifies set up, eliminates errors and speeds troubleshooting. The LinkWare Live cloud service gives you control of the whole process: you can set up and track your testers and inspect results from any mobile device while the job is in process. It even lets you upload and integrate results from multiple testers at multiple jobsites so you can quickly generate reports with the de-facto industry standard LinkWare PC. ***Eliminate the problems and get to system acceptance faster with Versiv – and make money every time you use it.***

“With Versiv, we spend more time getting the project done and less time setting up and troubleshooting. We’ve seen a significant decrease in missing and incorrect test reports by loading the tester with the settings and cable IDs for multiple projects before heading to the jobsite. This all translates into faster job completion, higher profits, and happier customers.”

**– Dave Lawes, RCDD, Regional Sales Manager
System Tech, Inc.**

Versiv provides everything you need to Certify, Manage and Report on your Cable Installation Projects

Versiv features a modular design with swappable testing modules that provide four types of testing plus report generation software and a cloud service for managing jobs. Bundles are available to combine functions and save money.

DSX-5000 CableAnalyzer™ – Copper Certification	OptiFiber® Pro - OTDR
<ul style="list-style-type: none"> • Unmatched speed for Cat 6A, Class F_A and all current standards • Graphically displays the source of failures including crosstalk, return loss and shield faults • Meets IEC Level V – the most stringent accuracy requirement • Endorsed by cabling vendors worldwide 	<ul style="list-style-type: none"> • Industry's shortest event and attenuation dead zones • Accelerate fiber certification with the fastest set-up and trace times • EventMap™ view negates the need for OTDR Trace Analysis • SmartLoop tests two fibers in both directions, averaging the losses whilst keeping the tester at one end
CertiFiber® Pro – Optical Loss Test Set	FI-7000 FiberInspector™ Pro
<ul style="list-style-type: none"> • Fastest time to certify – two fibers at two wavelengths in three seconds • Full Encircled Flux compliance, per TIA/ISO requirements • Convenient quad module supports both multi-mode and single-mode loss testing • Extended single-mode distance range to 130 km • Built in Visual Fault Locator 	<ul style="list-style-type: none"> • Automated Pass/Fail certification of fiber optic connector end-faces • Graphical indication of problem areas due to contamination, pits, chips, and scratches • Certify to industry standards - IEC 61300-3-35 • Eliminate human subjectivity from fiber optic connector end-face measurements • Save fiber optic connector end-face views during certification process

Manage and Report on your Cabling Jobs

LinkWare™ Live

Turbocharge your team.

LinkWare Live is a cloud-based service that lets you manage Versiv certification jobs anytime, anywhere, with anyone on any device.

Keep track of every test on every job.

Get an overview of every project from any smart device. Drill down to each individual test. Instantly receive notification of incorrect test setting or cable IDs.

Get it right the first time.

Define cable IDs and test settings from your PC or tablet. Then send them to the testers at the jobsite for mistake-free testing.

Manage Your Testers

Stay up to date. Standards can change without notice, and out-of-date test limits or calibration mean hours of re-testing. LinkWare Live automatically ensures your testers are running the latest.

Test Result Management

Stop wasting time and gas driving testers back to the office. Upload your test results straight from the job site to LinkWare Live over Wi-Fi. Then download them automatically to the right job for fast report generation with LinkWare PC.

LinkWare™ PC

The job's not finished until the reports are done.

LinkWare Cable Test Management Software lets you manage all the results from multiple testers using one Windows™ PC application.

- Electronically save, maintain and archive test results
- Deliver professional reports in a common format
- LinkWare Stats™ provides a comprehensive view of your entire cable plant's performance
- Standards compliant with the ability to configure and print TIA 606-B documentation
- Simple user interface and time-saving features for increased productivity

Stay Educated with Fluke Networks

Certified Cabling Test Technician Training (CCTT)

Contractors need to train and certify their employees to stay competitive in the installation and certification of high-speed structured cabling systems. Investing in the Fluke Networks, Certified Cabling Test Technician™ (CCTT) two-day training and certification program will not only improve the skills of your installers, but also their effectiveness and productivity on the job in testing, certifying and troubleshooting cabling systems.

The Fluke Networks CCTT course consists of two days, each comprised of three parts: classroom training, hands-on labs, and exam/certification exercises.

www.flukenetworks.com/cctt

Online Training Videos

These videos provide basic training for the complete Versiv family. For each product, a set of videos cover the following topics:

- Unboxing – what comes with the product and what to do with it
- Setting Up a Test
- Running a Test
- Saving and Managing Results
(using LinkWare™ PC and LinkWare™ Live)

Each video is between three and ten minutes in length. The complete series of videos totals about two hours and twenty minutes.
