

MPO-2000 Series

Multi-function Programmable Oscilloscope

FEATURES

- MPO-2000P: 200MHz; 4CH/2CH MPO-2000B: 100MHz; 4CH/2CH
- Allow to Use Python Scripts to Control for Automation Purpose
- Dual Channel Spectrum Analyzer with Spectrogram
- I²C/SPI/UART/CAN/LIN Serial Bus Trigger and Decoding Function
- MPO-2000P: CAN-FD, USB 2.0 (Full Speed), FlexRay, USB-PD, I² S Digital Decoding
- MPO-2000B: CAN-FD, USB 2.0 (Full Speed) Digital Decoding
- MPO-2000P: Supports USB HID Protocol, Which Can be Used to Connect Keyboard, Mouse and Barcode Scanner Under Python Script Control
- MPO-2000P: Supports USB Host CDC-ACM Protocol, Which Controls Other GW Instek Instruments
- Equips with a Spectrum Analyzer; a Dual Channel 25MHz AWG; DMM and Power Supply
- Power Supply: Dual Channel Output, 1V to 20V Continuously Adjustable (0.1V step)

The MPO-2000 series is named after the abbreviation of Multi-function Programmable Oscilloscope. In addition to being an oscilloscope, it also includes a spectrum analyzer, an arbitrary waveform generator, a digital multimeter and a DC power supply. In addition to the five-in-one multi-functional architecture, we innovatively introduced the Python script function into the MPO-2000, so that users can conduct program control of a small automated test system by setting up a single unit test or multi-unit test without a PC, hence, the name MPO.

The MPO-2000 series provides Basic and Professional versions (model suffixes are represented by B and P). In terms of bandwidth, the Basic version is 100MHz and the Professional version is 200MHz and the main difference is that the Professional version provides larger program memory and more system resources to achieve the ability to process longer waveform data. The series provides USB CDC device control to meet the needs of multi-unit collaborative tests, and a Python GUI library is provided to allow users to modify the original built-in Python APP or write their own programs that present curve drawing and GUI operation menus to be packaged into Python programs developed by third parties. The Basic version features the provided demo programs that can be executed (including programs with USB device control and GUI) and Python programs provided by third parties. In addition, the Professional version provides more diverse bus decoding functions, including FlexRay, USB-PD and I²S. A large number of bus decoding functions are included in the standard configuration, and users do not have to pay to have the functions, making MPO-2000 more competitive.

MPO-2000P is the only product of its class that has a built-in Python GUI library. Users can build their own test systems at a lower cost. A variety of executable Python APPs are built-in. An all-in-one instrument with affordable pricing is ideal for test and measurement automation teaching courses; small-scale automated test of production lines, component tolerance testing for quality assurance, and diversified test applications. It is hoped that the launch of MPO-2000 can solve users' product test needs for repeatability and diversity, and can improve users' demand for simple and repetitive work efficiency and single-unit program control or the requirement of uploading test results to the cloud. It is also hoped that with the launch of MPO-2000, new markets can be explored in the fiercely competitive oscilloscope market and the overall competition of oscilloscopes can be improved.

Why do we choose to import Python into the oscilloscope? In the survey of top programming languages on GitHub in 2022, Python is second only to JavaScript in web-related applications, ranking second in the most popular programming language. The number of users of Python continues to grow, and the entry threshold is low. For beginners, its syntax is relatively simple and easy to learn. Python has become an increasingly common programming language, so we chose Python to be imported into the oscilloscopes to expand its program control applications.

The Python APP currently installed on MPO-2000 includes the following categories: BJT output characteristic curve; LC oscillator circuit frequency and temperature characteristic curve; fuse endurance test; LED forward bias characteristic curve and barcode scanner measurement application.

Python APP for MPO-2000

On the MPO-2000, if users want to modify or call the script of the drawing library, they must purchase the Pro version to modify the program by themselves to meet the testing of different DUTs. In addition, other manufacturers can use the built-in AWG function of the oscilloscope to achieve similar effects, but the voltage and power of this kind of AWG are too small, and their practicality is low. One single MPO-2000 unit can meet the IV test requirements of parts suitable for voltages below 20V.

MPO-2000 is the only five-in-one instrument in the same class and provides seven innovative functions to extend diverse applications. The seven innovative functions include Python script execution, component tester I-V curve, MQTT protocol, series bus decoding, spectrogram, Python GUI library* and USB CDC-ACM USB*. (*: Professional version only).

A. PYTHON SCRIPT EXECUTION

Maximum number of installable python APPs: 100 sets (including pre-installed Python APPs).Running Python source code (.py file) from internal disk or USB flash disk.

B. COMPONENT TESTER I-V CURVE

Providing I-V characteristic curve (Curve Tracer) with readout scale. The transistor characteristic curve is our first application after completing the Python software platform. We use MPO-2000 to implement the Curve Tracer function application. XY mode is used to have waveform

accumulation (as shown in the figures below). Users can use the two built-in 20V DC power outputs of MPO-2000. The Professional version can use an external DC power supply through USB CDC-ACM.

C. SUPPORT MQTT PROTOCOL

MPO-2000 also supports MQTT (Message Queuing Telemetry Transport) protocol. For publishers, measurement data can be transmitted to the cloud and for subscribers, remote control of an oscilloscope can be realized.

D. SERIAL BUS DECODING

Decoding Category	Application			
CAN-FD	Automobile/electric vehicle control system signal transmission			
USB 2.0 (Full Speed)	PC peripheral device/CPU embedded system development			
FlexRay (Professional Version)	Automobile/electric vehicle control system signal transmission			
I ² S (Professional Version)	Digital audio signal transmission			
USB-PD (Professional Version)	USB Power Delivery for portable battery quick charging			

MPO-2000 provides CAN FD / USB 2.0 (FS) decoding in the Basic version and CAN FD / USB 2.0 (FS) / FlexRay / USB PD / I²S decoding is provided in the Professional version. No additional options are required for decoding and analysis of new automotive, USB and audio protocols.

E. DUAL CHANNEL SPECTRUM ANALYZER WITH SPECTROGRAM

Other than signal measurement on time domain, MPO-2000 also provides the frequency domain measurement and operation, which are similar to a spectrum analyzer. The dual channel spectrum analyzer and spectrogram are equipped. Users can measure and analyze dual channel frequency domain signals at the same time. The spectrogram function, which allows users to easily observe the signal's strength distribution and the relationship of the spectrum distribution over time. For promotion selling point, dual Spectrum Analyzer and Spectrogram can test the frequency response of low frequency ~ VHF wireless communication; audio processing; vibration analysis (abnormal resonance of mechanical equipment), etc.

F. SUPPORT PYTHON GUI LIBRARY

The Basic version can execute Python APP (with scale) with GUI drawing mode, and the parameters can be modified to accommodate the testing of different parts to be tested. If users wish to modify the script that is from the drawing library, users must purchase the Pro version to modify the program by themselves. The Python GUI library can be used to draw scaled charts. (As shown in the figures left, users can set two background colors).

G. SUPPORT USB CDC-ACM TO ACHIEVE MULTI-UNIT COLLABORATIVE TEST

As Console: Control Other Instruments

The above two schematic diagrams are single-unit and multi-unit collaborative tests. No additional computer is required. Users only need to plug in a USB keyboard to program on a MPO-2000P model, and the measurement results can be presented in charts. It can also be saved

Standalone Auto-measurement

as a CSV or image file, or uploaded to the cloud. The series is equipped with Python Script Execution (Edge Computing). It has the function of Python script execution to implement edge computing.

SPECIFICATIONS						
Model	MPO-2102B	MPO-2104B	MPO-2202P	MPO-2204P		
DMM SPECIFICATIONS						
Reading	5,000 counts					
Voltage Input	CAT II 600Vrms, CAT III 300Vrms Below are the basic conditions required to operate the DMM within specifications:					
	 Calibration: Yearly. 2. Operating Temperature Specification: 18–28°C (64.4–82.4°F). Relative humidity: 80%. (Non-condensing). Accuracy: ± (% of Reading + % of Range). AC measurement are based on a 50% duty cycle. 					
DC Voltage	50mV, 500mV, 5V, 50V, 500V, 1000V	6 ranges				
Accuracy	50mV, 500mV, 5V, 50V, 500V, 1000V ±	(0.1% + 0.1%)				
Input Impedance	ΙΟΜΩ					
DC Current	50mA, 500mA, 10A 3 ranges					
Accuracy	50mA - 500mA: ±(0.5% + 0.1%); 10A ±(0.5%+0.5%)					
AC Voltage	50mV, 500mV, 5V, 50V, 700V 5 ranges					
Accuracy	50mV, 500mV, 5V, 50V, 700V ±(1.5%+	1.5%) at 50Hz~1kHz				
AC Current	50mA, 500mA, 10A 3 ranges		111 × 14 30 4			
Accuracy	50mA, 500mA, ±(1.5% + 0.1%) at 50H		kHz ; * Measure range: >10mA			
Resistance*	500Ω, 5kΩ, 50kΩ, 500kΩ, 5MΩ, 5 rang 500Ω, 5kΩ, 50kΩ, 500kΩ ±(0.3% +0.0					
Accuracy Diode test						
Temperature (Thermocouple)*	Maximum forward voltage 1.5V, Open voltage 2.8V Range: -50°C ~ + 1000°C; Resolution: 0.1°C * Specifications do not include probe accuracy.					
POWER SUPPLY SPECIFICATIONS	hange, so e - i rooo e, kesoldion. e	e opecifications do not melude p				
Output Channel	CH1 & CH2					
Output Range	1V~5V/1A; 5V~10V/0.5A; 10V~20V/0.2	5A ; Peak current: 1A @250ms				
Voltage Step	0.1V Continuously Adjustable					
Output Voltage Accuracy	±3%					
Ripple and Noise	50mVrms					
DISPLAY						
TFT LCD Type	8" TFT LCD WVGA color display					
Display Resolution	800 horizontal × 480 vertical pixels (W	VGA)				
Interpolation	Sin(x)/x	,				
Waveform Display	Dots, vectors, variable persistence (16	ms~4s) infinite persistence				
Waveform Update Rate	120,000 waveforms per second, maxim	/ 1				
· ·		lum				
Display Graticule	8 x 10 divisions					
Display Mode INTERFACE	YT;XY					
USB 2.0 Hi-speed Host Port						
•	One on the front panel. Supporting USB2.0 Mass Storage Class (FAT32 or NTFS formatted); Professional version (MPO-2000P series) also supports USB CDC ACM Class and USB HID Class					
USB 2.0 Hi-speed Device Port	One on the rear panel, USBTMC Class is supported					
Ethernet(LAN) Port	RJ-45 connector, 10/100Mbps with HP Auto-MDIX which also supporting TCP sockets communication, the TCP socket communication is using the default 5025 port number					
Web Server	Supporting remote control and monitoring of the oscilloscope in web browser by using the LAN					
Go-NoGo BNC	5V Max/10mA TTL open collector output					
Kensington Style Lock	Rear-panel security slot connects to sta	andard Kensington-style lock				
MISCELLANEOUS						
Multi-language Menu	Available					
Operation Environment	Temperature: 0°C to 50°C. Relative Humidity \leq 80% at 40°C or below; \leq 45% at 41°C ~ 50°C					
Python Script Execution (µPy)						
· / Cop. 2	Maximum number of installable python apps: 100 sets (including the pre-installed Python apps); Note. There is no restriction on script files (*.py); APPs installation capacity limit: 20M byte maximum;					
	MOTT Protocol: "Message Queuing Telemetry Transport" is supported which including the "Publish" and "Subscribe" pattern.					
	Basic version (MPC-2000B series): Supporting 1,000 points waveform data processing; Professional version (MPC-2000P series): Supporting USB					
	CDC ACM Class, USB HID Class, Python GUI library, 100,000 points waveform data processing					
Component Tester						
Time Clock	Providing I-V characteristic curve (tracer) with readout scale; Please refer to the application note for the details					
	Time and Date ,Provide the Date/Time for saved data					
Internal flash disk	100M bytes Single-Level Cell flesh mer					
Installed APP	Go/NoGo, DVM, DataLog, Digital Filter, Frequency Response Analyzer, Mask, CAN-FD * , USB2.0 (full speed) * , FlexRay * + , I2S * +, USB-PD * +, Mount Remote Disk, Demo. *: Available for bus decoder function ; + : For Professional version (MPO-2000P series) Note: The I2S bus decoder is only available on 4 channel models.					
Dimensione 8 W-1-bt	,					
Dimensions & Weight	384mmX208mmX127.3mm, Approx. 3	кд
