

Smart portable unit allows transfer function measurement in the field

2-Channel Compact FFT Analyzer SA-78

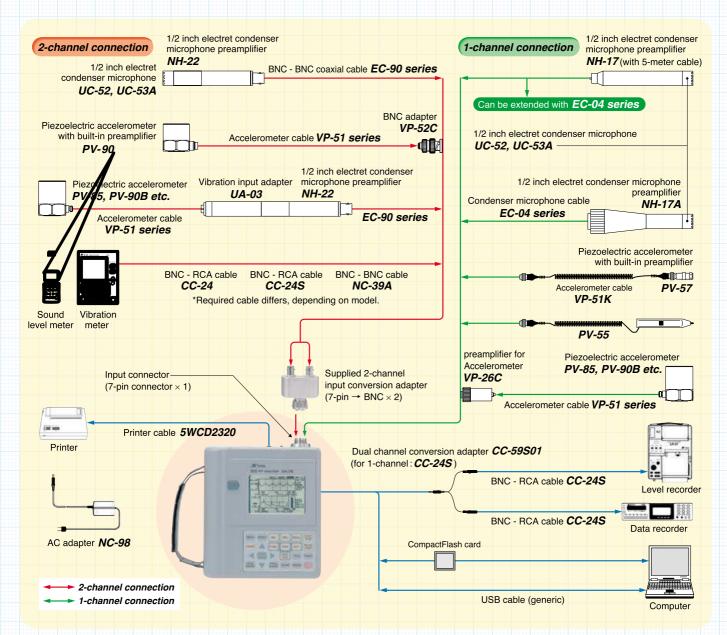

Outline

The SA-78 is a 2-channel FFT analyzer designed for easy portability. It is convenient for performing sound or vibration FFT analysis as well as octave analysis in the field. The dual channel configuration allows transfer function measurement and other advanced measurement-quality electret condenser microphone. CompactFlash memory cards are used to store data and measurement results. Data can then be easily transferred to a computer for display as a graph or further processing by spreadsheet applications. An optional Waveform Recording Card (SA-78WR) allows long-term time waveform recording.

Features

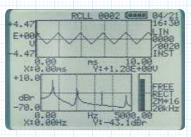

- Direct connection of microphone or accelerometer possible.
 (Using CCLD type microphone preamplifier NH-22)
- 2-channel input allows easy transfer function measurement in the field.
- Support for FFT processing and octave analysis (synthesized).
- Upper frequency limit of 80 kHz enables ultrasound analysis.
- Measurement results and waveform data can be stored on memory card.
 - (For waveform recording, the optional Waveform Recording Card SA-78WR is required.)

- Waveform analysis can be carried out using Waveform Analysis Software CAT-78WR.
- USB port allows easy connection to PC (only using supplied Data Monitoring Software).
- Hard copy of measurement results can be produced on site (with optional printer).
- Connection of data recorder with AC output supported.
- Light weight and compact dimensions combined with intuitive operation allow easy use anywhere.
- Operates up to 15 hours on a set of four IEC R14 (size C) batteries (backlight and CCLD functions off)

Peak list display

The Waveform Recording Card SA-78WR contains optional software for the 2-Channel Compact FFT Analyzer SA-78. The software implements a time waveform

recording function directly in the SA-78. After the function has been installed, signal

waveform data along with calibration data are saved in WAVE file format

(****.WAV) on a dedicated CompactFlash card inserted in the SA-78. The resulting

data files can be processed using the Waveform Analysis Software CAT-78WR.

Option

Waveform Recording Card SA-78WR

Integrates a time waveform recording function in the 2-Channel Compact **FFTAnalyzer**

Specifications

Recording media : PCMCIA standard CompactFlash card (128 MB)

Recorded data: WAVE format

Capacity: 1 MB/(10 s/1 ch/20 kHz) Frequency range: 100Hz-20kHz

Trigger : Free-run, single

Waveform analysis software: Waveform Analysis Software

CAT-78WR or Multi-Channel Analyzer SA-01

Maximum recording times (using 128 MB CF card)

	100Hz	200Hz	500Hz	1kHz	2kHz	5kHz	10kHz	20kHz
1 channel recording	66 h 40 m	33 h 20 m	13 h 20 m	6 h 40 m	3 h 20 m	1 h 20 m	40 m	20 m
2 channel recording	33 h 20 m	16 h 40 m	6 h 40 m	3 h 20 m	1 h 40 m	40 m	20 m	-

*Use only CompactFlash cards supplied by Rion as recording media.

SA-78WR screen

Option

Waveform Analysis Software CAT-78WR

Supported operating systems: Windows 98SE, Me, 2000, XP

(This software is a product of Catec Inc.)

The software allows processing and storage management of WAVE format files containing data recorded using the 2-Channel Compact FFT Analyzer SA-78 in conjunction with the Waveform Recording Card SA-78WR. FFT analysis or octave analysis can be selected.

Specifications

FFT analysis

Frequency range: 100, 200, 500, 1k, 2k, 5k, 10k, 20k

Number of sampling points: 64 - 32768

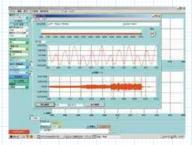

Averaging functions: Linear, maximum hold Window functions: Rectangular, Hanning,

Flat-top, Exponential, Force

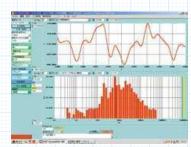

Display functions: Power spectrum, cross spectrum,

spectrum map, transfer function,

coherence

Waveform read-in screen

FFT & 1/3 octave analysis screen

1/N octave analysis

Filter compliance: JIS 1514:2002

IEC 61260-1995 CLASS 1

Analysis frequency: 1/1 octave

0.5 - 8,000 Hz (15 bands)

1/3 octave

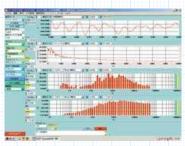

0.4 - 10,000 Hz (45 bands)

1/12 octave

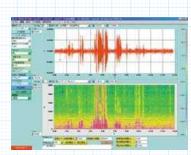

0.36 - 11,000 Hz (180 bands)

Averaging functions: Linear, exponential, maximum hold

Display functions: Bar graph, numerical list

4-graph screen

Spectrum map screen

Specifications

I Ministra Committee			
Number of channels	2		
Input connectors	BNC × 2 (with supplied input converter)		
Input impedance	100 ΚΩ		
Maximum input voltage	±20 V		
Input coupling type	AC or DC (for 0.5 Hz/-3 dB for AC)		
Sensor drive power supply (CCLD)	2 mA, 18 V (4 mA sensors can also be connected)		
Frequency range	DC - 80 kHz		
Level range	-40 to +20 dB (10-dB steps) 0 dB/1 Vrms		
Input filters	High-pass filter: 20 Hz, 100 Hz (-1 dB point) Low-pass filter: 1 kHz		
·	20 kHz (-1 dB point) Both switchable, attenuation slope -18 dB/oct		
Overload	Range full-scale +2 dB (overload warning indication on display		
A/D converter	16 bit (sigma-delta type)		
Dynamic range Overall 85 dB (60 dB for 50 kHz range and 80 kHz r			
Analyzer section			
Frequency range	100, 200, 500, 1 k, 2 k, 5 k, 10 k, 20 k, 50 k, 80 k Hz		
Reference channel	Channel A or B, selectable		
Analysis functions	Time waveform, power spectrum, cross power spectrum (amplitude		
	phase), transfer function (amplitude, phase), coherence Rectangular, Hanning, Flat-top		
Window types			
FFT zoom settings	101 (×1), 201 (×2), 401 (×4), 801 (×8), 1601 (×16) lines		
Averaging processing	Processing modes: linear averaging, exponential averaging, peal		
, woraging processing	hold (power spectrum only)		
	Processing domain: time (linear averaging only), frequency		
	Number of averaging runs: 1 to 8000		
	* To perform averaging in the time domain, analysis of averaged time waveform is used		
Arithmetic frequency	Types: A characteristics, 2 user-defined characteristics		
weighting	Weighting target: overall value		
	*User-defined characteristics are read from file with frequency		
	compensation data (created with Excel or similar) on CompactFlash card		
Octave synthesis	Types: 1/1 octave, 1/3 octave		
Octave synthesis	Targets: power spectrum, cross power spectrum (×16 zoom)		
D.W			
Differentiation	Types: $-1/\omega^2$, $1/j\omega$, $j\omega$, $-\omega^2$		
	Targets: power spectrum, cross power spectrum, transfer function		
Overall value	Normal overall value and frequency weighted overall value are calculated		
	simultaneously. (If frequency weighting was specified, partial overall is calculated.)		
Display			
Display type	192×128 dot LCD (77.5 \times 54 mm) with backlight		
Number of graphs	1 or 2		
Graph types	Time waveform, power spectrum, cross power spectrum (power), cross power		
' ''	spectrum (phase), transfer function (amplitude), transfer function (phase), coherence		
Peak list	Frequency and numerical value for ten highest values in selected		
I can list			
	function type are shown as list display.		
	And the second of the second o		
Number of frequency lines	* Not available for time waveform, cross power spectrum (phase), transfer function (phase), and coherence 101 + overall value + frequency weighted overall value
