R&S®FSQ-B17 digital baseband interface

The R&S®FSQ-B17 option provides access to the digital baseband signals of the R&S®FSG. These signals are downconverted analog signals from the RF input.

The digital baseband data (I/Q data) is available at the I/Q DATA OUT connector of the R&S®FSQ-B17 option.

The R&S®FSQ-B17 option supports the output of digital baseband signals.

The characteristics of the output signal are specified below.

The configuration of this option is performed exclusively via remote control.
