IFF-45TS MK XIIA/TACAN Bench Test Set

Optional controller shown

A leading edge RF signal generator designed for Mode 5 engineering and manufacturing applications

- AIMS Certified (All modes including Mode 5 (Level 1 & 2))
- Supports DoD AIMS 04-900A Option A (KIV-78) and Option B (KIV-77) crypto appliquéés
- Dual I/O for diversity transponder or sum/difference interrogator testing
- Separate RF I/O for direct connection to equipment under test, or connection to antennas for over-the-air testing
- Software defined radio design provides waveform flexibility and future growth potential
- Dual signal generators can produce coordinated signals for echo and interference testing
- Antenna ports provide one watt signal generator outputs and -44 dBm receiver sensitivity, to allow for extended range over-the-air testing
- Can produce levels above MTL at up to 3 kM (greater distances or power levels are achievable with a directional antenna)
- Remote interfaces: GPIB, RS-232 and Ethernet (VXI-11)

The IFF-45TS is an RF signal generator that provides support for AIMS Mark XIIA transponders and interrogators. It operates under remote control from a computer or ATE system and provides versatile signal generation and measurement capability of Mark XIIA system signals in bench and over-the-air applications. Typical applications include:

- Support for engineering development of Mark XIIA equipment (Mode 5)
- Manufacturing ATE for Mark XIIA equipment
- Support for AIMS 03-1000A and DO-181D certification testing
- Over-the-air testing of Mark XIIA equipment
- Test range to 3 km with appropriate antennas
- Ramp testing of installed equipment performance
